

Task 3: Grade Calculator

Develop a PHP script named `grade_calculator.php` that computes the average of three test scores and determines the corresponding letter grade.

Create a form where the user can input three test scores. Calculate the average and display it along with the corresponding grade (A, B, C, D, F).

Or, declare 3 variable test scores and calculate the average and display it along with the corresponding grade (A, B, C, D, F)
